

Gage: 20 Art Pieces

Tesseracts, pattern, music, math, and beauty in black and white

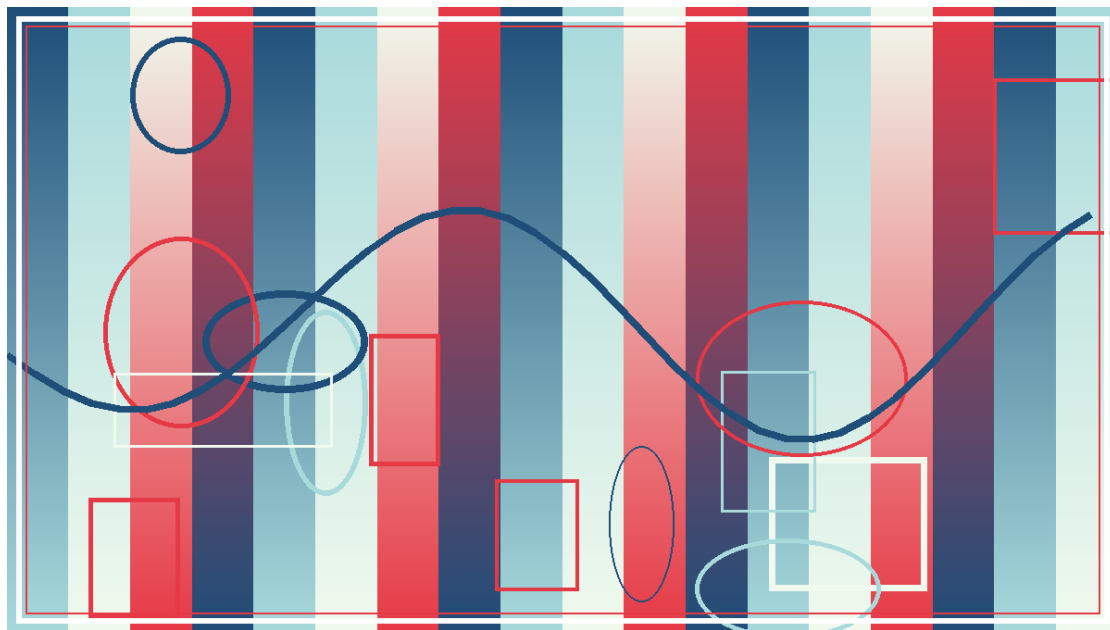

For Waynesville school staff: this is a simple art-first packet for Gage, age 12. The idea is that art can show pattern, perspective, structure, imagination, and meaning before a student has perfect words for it.

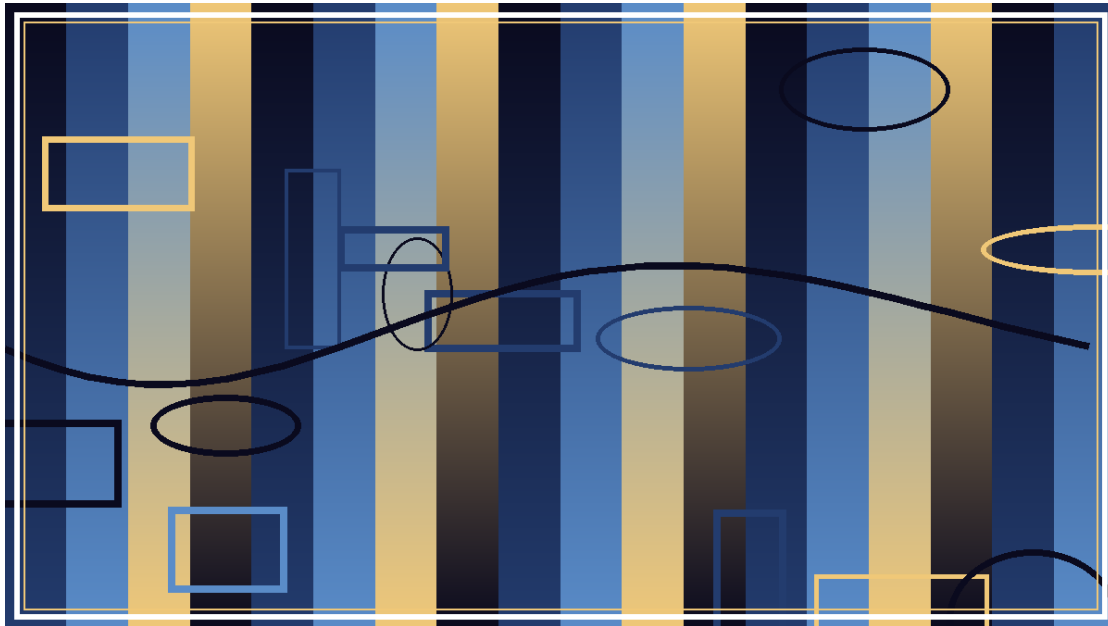

A tesseract is a way to imagine a higher-dimensional cube. As art, it says: the same thing can look different from another angle. That belongs to math, music, science, faith, and growing up.
